Item Body

Hi Tim and Rob,

Just wanted to check in with you two about the aquifer exemption findings I sent a few weeks back. Any questions about that or thoughts as to how you would like to proceed? We actually have a Class I permit renewal that is potentially impacted by this issue.

Also, I'm curious if you have a sense of timing for the response to our program review that we discussed in March. One of the Bakersfield reporters calls our office here periodically and asks whether EPA has received the state's response/plan for addressing the issues from our review. He called today.

Thanks,
David
